

LUIS ESQUIVEL

Security-Oriented Full-Stack Developer

Bucaramanga, Colombia (GMT-5) | laer12346@gmail.com | +57 305 256 8339 | github.com/L-Esquivel | linkedin.com/in/luisalejandroesquivelrojas

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience designing and shipping production systems end to end, from multi-tenant SaaS architecture to client-facing web platforms. Comfortable owning a project across the stack — backend API design, database architecture, frontend delivery, and deployment — with a growing focus on security practices (RBAC, tenant isolation, rate limiting, OAuth) as the bridge toward DevSecOps. Background in criminal investigation brings an evidence-driven, detail-oriented approach to debugging and system design.

EXPERIENCE

Full-Stack Developer & Operations Coordinator — Sweetland by Anny

April 2024 – Present | Remote

- Designed and built Precivox, a production multi-tenant Business Intelligence SaaS platform (React, Flask, PostgreSQL), evolving it from a single-tenant MVP into a full multi-tenant architecture with per-client data isolation, now at 279+ commits.
- Implemented core security patterns in production: RBAC, tenant isolation by tenant_id, API rate limiting, Google OAuth 2.0, and PBKDF2 password hashing.
- Migrated the platform's database layer from MySQL to PostgreSQL to support multi-tenant scaling, and built an advanced costing engine automating recipe/product cost calculations for the business.
- Balanced development work with operations coordination (procurement, logistics, customer support).

FEATURED PROJECTS

Precivox — Multi-Tenant BI SaaS Platform

React 19, Vite, Flask, PostgreSQL, Docker | github.com/L-Esquivel/Precivox

- 17 REST API blueprint modules, 60+ endpoints, covering costing, inventory, orders, tenants, and platform administration.
- Bilingual admin panel (EN/ES) with real-time BI dashboards (Recharts) for revenue, expenses, and profit margin tracking.

MEK Management — Bilingual WordPress Platform (Freelance)

WordPress, Elementor, Docker, Polylang

- Delivered a bilingual (ES/EN) institutional website end to end for a real client — from requirements gathering through a Dockerized WordPress development environment to production handoff.
- Managed the project independently: client communication, scope negotiation, and technical execution under a fixed budget and timeline.

TECHNICAL SKILLS

Security & Architecture

RBAC, Multi-tenancy, OAuth 2.0, API Design, Rate Limiting, Tenant Isolation

Backend & DevOps

Python, Flask, PostgreSQL, Docker, Git, Gunicorn

Frontend

React, JavaScript (ES6+), Vite, Recharts, i18n

Tools & Workflow

Cursor, Claude, Vercel, Railway, Linux CLI

CERTIFICATIONS

Completed: Cisco IT Support Specialist · Google AI Professional Certificate · Power BI for Beginners · Foundations of Cybersecurity · Talento Tech Programming Bootcamp (370h) · Networking Basics · Introduction to Cybersecurity

In Progress: Cisco Junior Cybersecurity Analyst (est. Sept 2026) · Google IT Support Professional Certificate · Google Cybersecurity Professional Certificate · Google Project Management Professional Certificate · AWS Certified Junior Software Developer · Google Cloud Cybersecurity Professional Certificate

EDUCATION

Criminal Investigation & Forensic Sciences — UNAB (Universidad Autónoma de Bucaramanga)

Near completion (2 courses remaining)

Brings an investigative, evidence-driven mindset to debugging and security-oriented thinking.

Languages: Spanish (Native) | English (C1 — Professional Working Proficiency)
